

GT Training Center – Houston, TX

Gauge Training GRG Booklet

## ***Measure with Confidence***

### **What are the benefits of proper thread inspection?**

- Results in proper thread engagement
- Improved quality of products
- Minimize material waste
- Increased safety
- Cost saving
- Significant reduction in production error
- Increased output capacity

## **Who We Are**

### **About Us**

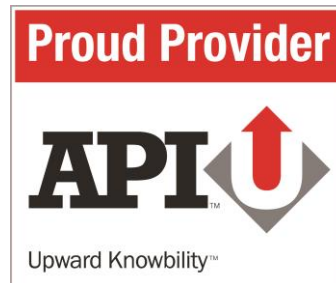

GT is a veteran owned, veteran operated privately held company founded in 2017, and fully licensed by API's University division. Currently the only authorized provider in the energy sector globally for the proper measuring, gauging and defining of API thread forms. Our hands on, intense instruction is comprehensive, thorough and fully encompasses all aspects of the thread measurement process.

*“Get your personalized API Accredited Thread Inspector card today!!”*

---

### Customer Dedicated Classes

Classes scheduled for a specific company and not open to the general public. These classes can be held at the GT Training Center in Texas, or at the customer’s location, or at a 3<sup>rd</sup> party facility. Classes have a maximum capacity of 10 participants per day. Contact GT for a specific quote to include all related costs where travel is required.

### Accredited Thread Inspector ID Card

Present off your accreditation card with a personalized thread inspector ID card with a validity of two years.

### Online Introductory Courses

Online courses are designed for new hires and as a “refresher” for experienced hands and cover threads and thread inspection and gauging techniques. Each course covers all connection details, defines the individual thread elements, how to properly inspect threads and why inspection is important. All participants must pass the section quizzes and the final exam to receive a certificate of completion. Successful completion of the online course yields a formal “Certificate of Completion”. These courses are a great introduction and overview to the subjects and excellent preparation for the more involved “hands on” in person instruction.
